**What is EMP?**

Cleartone Treated Strings feature a protective film called EMP – Enhanced Molecular Protection. This treatment helps prolong tonal life without sacrificing feel or sound. At one micron thin, it is up to one thousand times thinner than coated strings. In fact, EMP treated strings last as long or longer than other string brands on the market, but feel and sound like an uncoated set. This gives you exactly what you always wanted - killer Tone with an incredible lifespan.

**Cleartone Bass**

<b>6440</b>	Bass Light 40-100	<b>66.00</b>
<b>6445</b>	Bass Medium 45-105	<b>66.00</b>
<b>64130</b>	Bass 5th String .130	<b>31.00</b>

**Cleartone Strings feel and sound like a regular set, but designed to last 3-5 times longer.**

**Classical Strings with EMP Coating process**

Named after the famous city in Spain, Sevilla Classical Strings are designed for the most discerning classical guitarist. Sevilla Strings are classical guitar strings that feature Cleartone Strings Patented EMP Coating. At one micron, the Sevilla Strings treatment is the thinnest coating in the industry, designed to last a long time without compromising the feel and sound of traditional strings. "Silver wrapped wound strings are very susceptible to tarnishing," says product manager Jose Antonio. "With our EMP Treatment, Sevilla Strings last a long time while maintaining the natural feel and sound of traditional strings."

**RED Brand - Copper Bronze Acoustic Strings**

Introducing RED. The first brand of Copper Bronze acoustic guitar strings. With the highest copper content of any string material - more than 80/20 and more than phosphor bronze - RED Strings gives acoustic guitars precise articulation, louder sound, greater projection and a warmer, richer tone from the moment you tune them up. There hasn't been a significant new material introduced for acoustic guitar in 35 years.
